ABOUT ME

I have work experience as a software developer, specializing in mobile application development.My expertise lies in React Native, which allows me to create cross-platform mobile apps using JavaScript.I'm proficient in Node.js, using it for server-side development, and MongoDB for database management. I also have experience with Express.js, which is a popular Node.js web application framework. Additionally, I have skills in Figma, enabling me to design user interfaces and user experiences for mobile applications.This combination of skills allows me to work on end-to-end mobile app development, from design to backend development and front-end coding.

WORK EXPERIENCE

o **Mobile Application Developer**
2022 – present

- ✓ Experienced software developer specializing in React Native for cross-platform mobile app development using JavaScript.

- ✓ Proficient in Node.js for server-side development, MongoDB for database management, and Express.js for web applications.

- ✓ Skilled in Figma for designing seamless user interfaces and experiences. From concept to implementation, I excel in end-to-end mobile app development, covering design, backend, and front-end coding.
